

How to set up OpenLM Identity Service database with SQL Server

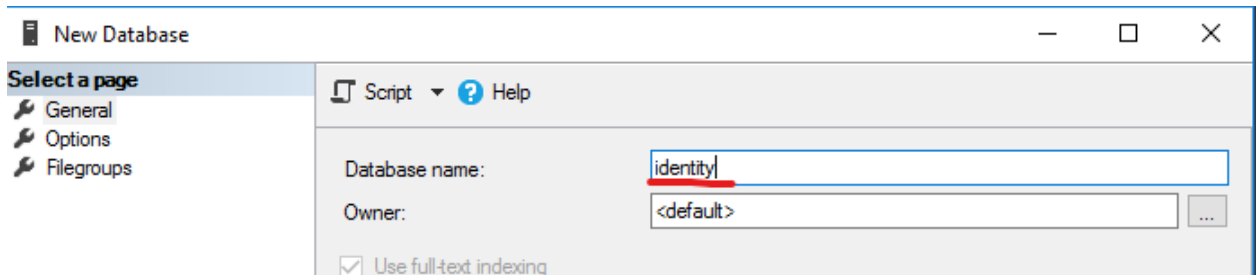

1. Go to MS SQL Management Studio and connect to your MS SQL Server

2. Right-click on "Databases" and then "New Database..."

3. Input the database name as "identity".

4. Navigate to the "Options" menu to find the collation selection drop-down menu. Select "SQL_Latin1_General_CS_AS" as the database collation and apply changes.

Collation:	SQL_Latin1_General_CP1_CS_AS	▼
Recovery model:	Simple	▼
Compatibility level:	SQL Server 2014 (120)	▼
Containment type:	None	▼

5. The database is ready to be connected with the Identity Service.
