

OneDirectorySync

Manage. Optimize. Maximize ROI.

What is OneDirectorySync (ODS)?

The single source of truth.

Manage only one directory, we will do the rest. The changes made in your organization's primary directory will be automatically synced with all connected directories. Don't lose control over your cloud services. Automatically remove stale accounts from the digital workspace.

OneDirectorySync Features

Eliminate security hazard

- ▲ Synchronize changes made in the primary directory.
- ▲ Replicate the change in any number of SaaS, IaaS, or PaaS services, such as Google Analytics, Firebase, Azure AD, GitLab, Salesforce, GitHub, Frontegg, Cloudflare, Buddy, Odoo, Jira, and more.

Eliminate stale accounts of users no more in the organization.

Off-board instantly

- ▲ Simplify user off-boarding.
- ▲ Central hub connecting all the resources of your digital workspace with your primary directory.

OneDirectorySync Features

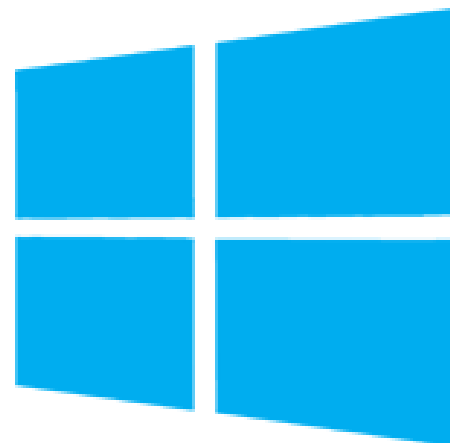

Single source of truth

- ▲ Manage just the organization's primary directory.
- ▲ When you make a change, it will be automatically replicated to all your cloud services, network appliances, routers, and VPNs.

Cloud Directories Hub

- ▲ More than just synchronization as a service
- ▲ Connects your primary directory to all external services, such as Google Analytics, Azure AD, Gitlab, Salesforce, Frontegg, Cloudflare, and many more.

Supported primary directories:

Active Directory

Azure AD

Apache Directory

Apache DS

Novell

Novell eDirectory

Google Cloud Directory

Supported external platforms:

At this stage: 44
